spencer

it's nice to  
meet you

i know i'm new in your neighborhood, but i'd  
like to be your connected care assistant. not  
sure what that means? let me explain

I can help you take your medications on time.

I dispense the pills you need when you need them.  
That means no more sorting and storing. And no  
more collections of pill bottles on the counter.  
Just me!

I come with a great app that helps you stay in  
touch with your caregiver.

Plus, I'm connected to your spencer-certified  
pharmacist. That means you can ask questions  
through the video chat feature on my screen. I talk  
directly to your pharmacist to help better manage  
your prescriptions and refills.

hello  
i'm  
spencer®

spencer

i'm highly-effective at helping you better  
manage your own health from your own home

realizing  
the value of  
spencer

“ 68-year old (female) spencer user

I really like spencer. I love that he knows exactly when I need to take my medication so I can do other things. He has opened up a new world [for me]...

“ spencer user (male) with Parkinson's Disease

Since starting on spencer I haven't missed a single dose and I used to forget all the time. I have even slept through the night, and am sleeping more deeply.

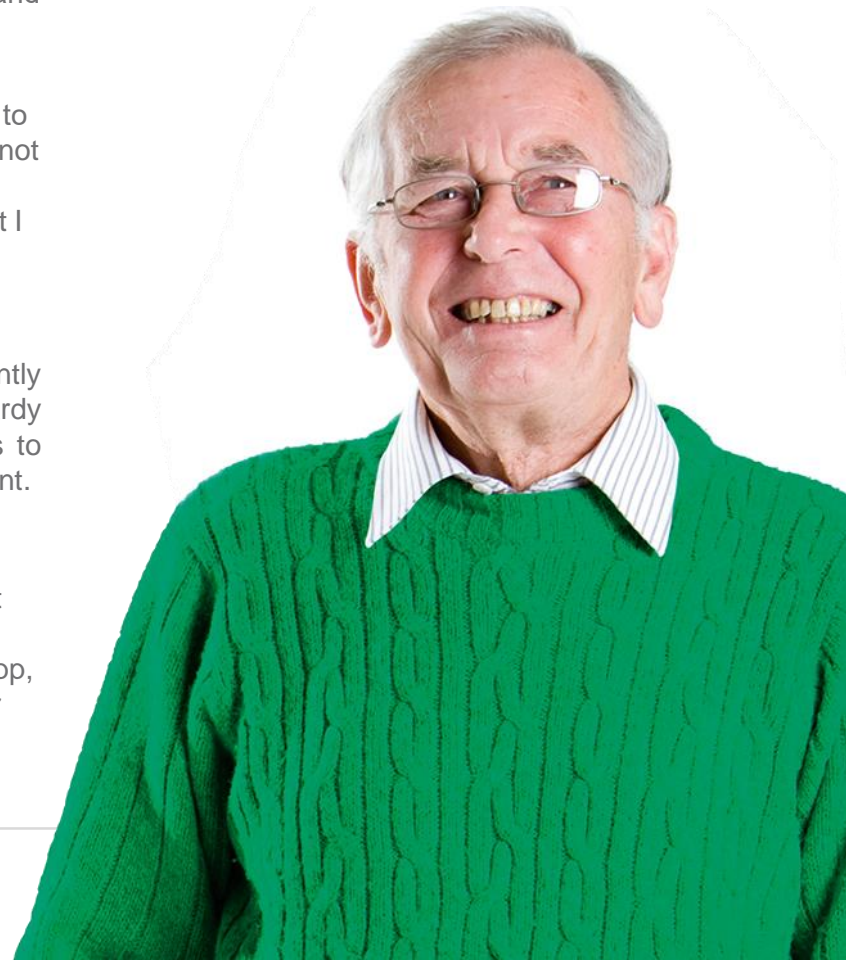

spencer is worth it's weight in gold because my wife used to spend hours handling my medications and now she does not need to be bothered with all that hassle of driving to pick them up and then sorting them all out. And she knows that I am taking everything on time which is great.

“ husband of spencer user

spencer has been performing very well. I am pleasantly surprised as to how easy it is to use. If I'm a little tardy dispensing the medication (for my wife) spencer seems to raise his voice which makes me smile. He is very persistent.

“ daughter of spencer user

The anxiety of whether Mum took her meds on the correct day at the appropriate time is no longer an issue, and we can also check on her adherence through the caregiver app, which we each have on our phones. spencer provides our family with peace of mind and our mum maintains her independence and quality of life.

# a little bit more about me

at my core, i'm a connected countertop pill dispenser. but i'm so much more than that

I help make managing your health easier. Here's how:

- I tell you when it's time to take your medication.
- I provide the right medications at the right time. All you have to do is hit my dispense button. Plus I'll tell you how long before your next dose.
- If a medication has special instructions – like taking it with food – I'll be sure to tell you that too.
- I give you feedback on how you're doing. And I can let your pharmacist or caregiver know how you're doing too.
- I'm Bluetooth enabled, so I can also do things like monitor your weight.

spencer

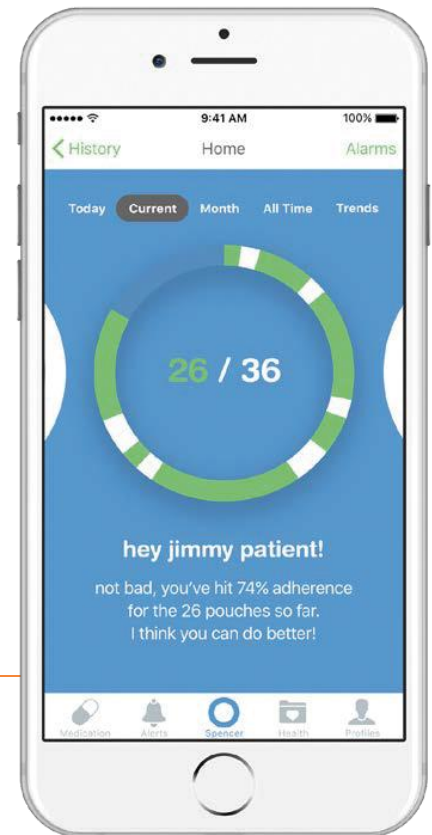

## i come with a caregiver app for your loved ones

My caregiver app lets people know if a dose was missed, or if there's a problem with keeping to a regular schedule. This is really important because missed medications simply don't work.

Pills come in all shapes and sizes, so my app provides a list of medications along with pictures of those meds. This provides confidence that the right pills are being taken at the right time.

All of this means you and yours can save time and worry less.

i'm  
connected  
for you

spencer

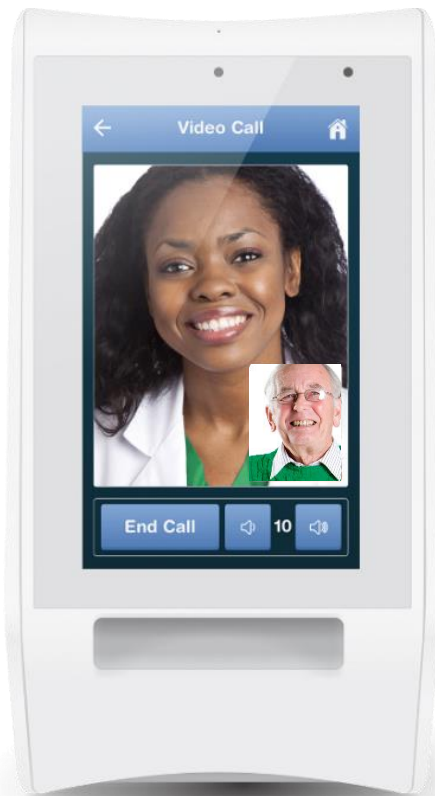

# i have my own certified pharmacy

## with me, you get access to your very own connected network of care

So, what does a connected network of care actually mean? It means better care, simplified. In addition to having me on your countertop, you also have access to a spencer-certified pharmacy team with experience helping people just like you.

The benefits of using a spencer-certified pharmacy include:

- Having all of your prescriptions refilled at the same time.
- Getting medications reviewed, counted and prepared in bar-coded packs to be dispensed at the correct time.
- Receiving medications delivered to your door in an easy to handle spencer refill. Simply drop the refill into spencer, and you're all set!
- Accessing a video call function directly on the spencer screen to chat face-to-face with your pharmacist from the comfort of your own home.

spencer

## 75% of adults don't take their medications correctly, which can lead to a higher risk of hospitalization

It's not surprising that caregivers deal with a lot of stress. It's hard work, it's time consuming, and it can feel like the weight of the world is on their shoulders.

With spencer, there is no more driving back and forth to the pharmacy, then sorting and boxing pills. Pre-packaged, bar-coded pill packs are delivered in a refill box that drops directly into the countertop dispenser.

Because the pill packs are bar-coded, caregivers can see if pills were dispensed on time, dispensed late, or missed altogether. They can even monitor biometric data. And this can all be viewed remotely with the caregiver app.

i can be a  
caregiver's  
best friend

being a caregiver is hard.  
spencer can help

*"Take as Directed: A Prescription Not Followed," Research conducted by the Polling Company. National Community Pharmacists Association December 16, 2006*
